Dear [REDACTED]

Please find attached our letter regarding the proposed development at Wisloe. Since our last email, the land to the right of the lane by our bungalow (which was originally planned to be the main entrance to the estate) has been flooded. A shallow pond has formed directly behind the hedge due to the heavy rain fall during the past few weeks. We have also had a lot of retaining water on our driveway which would normally drain off into the ditch on the other side of the lane, but not able to due to the flooding in the field.

If it is like this now, what will it be like if all this land behind us is built on. Where would the water go?

Susan please can you confirm receipt of this email.

Regards
