Local Plan Review
The Berkeley cluster: Wisloe

I strongly object to your proposal to build over 1,500 houses at Wisloe!

The long-standing rural nature of this immediate area will be destroyed, merging the local villages into one large town which will be unable to cope with the massive increase in demand for the already overstretched existing infrastructure :

Waste/sewerage will overflow!

Extra Transport needs:

More than 4,000 extra people along with their many cars will cause the local roads, junctions and roundabouts to become gridlocked! They are already nearly at full capacity!

Access & parking at the small local train station will be become very difficult!

The local Dr Surgeries will become oversubscribed and local shops will become overcrowded!

Using the existing network of local infrastructure will not cope, and I am sure that most of the above mentioned issues would not be adequately catered for within the time frame of the proposed building plan, if at all!

Yours faithfully
