I would like to Object to the Wisloe Green Proposed plan.

Firstly it goes against all good planing principles, not only will it coalesce Slimbridge with Cam and Cambridge and maybe even Gossington. It will also change the dynamics of Slimbridge Parish plonking 75% of the new Parish population in the new Town. This surely will destroy all the sense of Community and maybe the Communities themselves. Why would the new community vote to use it's council tax on these outlying regions. They won't care if when rains the water that was once held in the fields at Wisloe is now instantly thundering through Slimbridge and flooding it. They won't care about St John's road being blocked by parents dropping off or picking up kids outside the school or cars parking on the main road at the Patch. The whole centre of mass of Slimbridge Parish will be south-east of the A38.

Just using the data from surveys carried out on behalf of the ECT and GCC why is this being pushed forward. The noise survey said there was too much noise, even though they did most of it at times when it was at it's quietest. Other surveys said it was more likely to flood, have more air pollution, more traffic, Water quality would drop, and on and on. The only pluses were Housing and employment but no one said the Employment would be for locals, we already have empty Industrial units now! So really all we see from 1500 houses being built here is there will be more housing, Dah!

This seems to be an quick and easy solution to a complex problem which solves the problem of housing in one fell swoop but will leave new resident suffering with all the things that didn't seem so important as just building as many houses as you can in a place where there aren't enough voters to worry anyone important, yet.

Finally why build even more housing here in the south of the county and what happened to dispersal?

If this does ahead maybe one of the some of new parishioners will stand for election on SDC and put a stop to more bad judgements in planing!
