It is beyond me how building thousands of houses with almost no significant employment opportunities can make any sense except to councils who can make money from selling off land they own and developers whose sole interest is making money. The Ernest Cook Charity selling off land they own seems very odd as the charity is supposed to protect high quality land for agriculture.

The impact on OUR community will destroy the whole essence of rural communities in the area and will create an urban sprawl from Dursley to the A38 at Cambridge. There can be no justification for this proposal except to make money and tick boxes

With a Government that shows concern over pollution levels how can it be sensible to create a situation where several thousand extra car journeys a day will create ever more pollution to add to that already existing from the railway line, the M5 and an ever increasingly busy A38. The A38 is already very busy and close to capacity causing even pollution at traffic islands with traffic queuing

In summary this is a totally wrong proposal in a totally wrong place.

If development is deemed necessary it needs to be close to employment opportunities with some limited across the whole district. **WE DO NOT WANT OUR RURAL COMMUNITIES DESTROYED**
