Hello

I had started filling in and saved a couple of versions of the smart surveys in particular the Policies Survey but also some of the other surveys I rang a very helpful member of the team during the day to as I was having remote access issues to WiFi to check whether comments could still be received until midnight and was reassured that feedback received during the night could be accepted Unfortunately the smart survey closed and what I had written so far appears to be lost?

In retrospect I could have done it by phone but that was challenging

As a minimum I would like to register strong support for the following policies but am wondering whether I can follow up with my full comments on these and other policies relating to in particular net gain for biodiversity and green infrastructure eg on Thursday when I will have full internet access

\*NEW \* Core Policy DCP1 Delivering Carbon Neutral by 2030

Delivery Policy ES1 Sustainable construction and design (this one now proposes Carbon Zero new development)

Delivery Policy ES2 Renewable or low carbon energy generation (this supports new renewable energy developments)

Thank you in advance
