Comments from Representors in response to Supporting Document from Applicant.

Rep 1	I do not think there is anything in this submission that could possibly mitigate or stop any negative impact on the village or its surrounding areas once customers have left, having bought as much liquor as they like, at any point after normal trading hours. This is especially so for instance at weekends alter closing time in pubs and bars for instance both locally and further afield if people are travelling to Gloucester or Bristol for a night out. In which case there would be an issue about where this liquor would be consumed, obviously not anywhere on the premises that is not the problem, I think the layby could be an issue or as we have previously suggested in one of the known park up spots and I'm guessing for instance down by the Brook at Damery Lane which would be a perfect option.
